Position: **IT Engineer**

What We Can Offer

·   Work in a dynamic environment alongside with team members who are talented and passionate about what they do.

·   Attractive salary, annual rise and plus 13th & 14th month salary.

·   High bonus and incentive based on performance, seniority.

·   Long-term service award.

·   Yearly award for best-performing employees.

·   Outstanding annual company trip.

·   Team building events are fully sponsored by company.

·   Annual health check and (PVI) health insurance.

·   Complimentary duty meals, snack & beverage.

·   In-house health club: gym, swimming pool, soccer field, volleyball court, and entertainment area.

What You Will Do

·   Establish networking environment by designing system configuration; directing system installation; defining, documenting, and enforcing system standards.

·   Maximize network performance by monitoring; troubleshooting problems and outages; scheduling upgrades; and collaborating with ISPs/partners on connection optimization.

·   Configure and install various network devices and services (e.g., router, switch, firewall, load balancer, VPN, QoS)

·   Secure network system by establishing and enforcing policies; defining and monitoring access.

·   Install, configure, test and maintain operating systems, software applications and system management tools.

·   Monitor system daily and respond immediately to security or usability concerns.

· Proactively ensure the highest levels of system and infrastructure availability.

· Write and maintain custom scripts to increase working efficiency and decrease the human intervention time on any tasks.

· Provide support to users; work directly with them to resolve problems relating to any IT services.

· Complete tasks assigned by Team Leader/BOD.

You should NOT apply if you are:

· Not looking for a long-term engagement.

· Not having passion about researching new technologies.

What we require from you

· Understanding of networking protocols (e.g., IPSEC, HSRP, BGP, OSPF, 802.11, QoS).

· Solid understanding of the OSI or TCP/IP model.

· Experience with monitoring, network diagnostic and network analytics tools.

· Experience with virtualization and containerization (e.g., VMware, Docker)

· Solid scripting skills (e.g., shell scripts, vb scripts)

· Having CCNP, MCSE, LPI is a plus.

· Good English (TOEIC 500+).
